

PRODUCT INFORMATION

HASCO FM GLACIER GREASE

NSF REGISTERED

Product Description

Hasco FM Glacier Grease is an odorless food grade grease designed for extreme pressure applications. Glacier is transparent and dyed blue for identification and to differentiate it from its complimentary product, Hasco Crystal FM Grease. Although Glacier can be used in multiple applications, it is designed for high load and high temperature applications. Glacier is available in NGLI grade 2. The unique base oil/thickener combination allows for Crystal Greases to have outstanding water-washout properties.

Applications

- Roller and plain bearings found in food processing machinery
- Gear boxes where grease is preferred over oil
- Sealants to prevent contaminants from entering components

Features

- Clear blue for easy identification
- Excellent to -40F
- Provides lubrication at temperatures up to 400F
- Synthetic base stock
- Timken OK Load – 40 pound
- Certified NSF and Kosher

TYPICAL SPECIFICATIONS

NLGI GRADE	2
Penetration @ 77F	270-290
