

PRODUCT INFORMATION

HASCO FM GEAR OILS

NSF Registered

Product Description

Hasco FM Gear Lubricants are mineral-oil based products designed to effectively lubricate gear sets and remove heat from loaded and/or high speed systems. Hasco FM Gear Lubricants are available in ISO grades 68 through 680. Hasco FM Gear Lubricants can also serve as lubricants for industrial worm gears, rotary steamers and flexible couplings.

Applications

- Straight, bevel, double reduction and worm gear sets.
- Refrigeration conveyor chains
- Airline lubricators
- Reciprocating air compressors

Features

- Versatile product that covers many applications
- Foam inhibited to maximize lubrication
- Meets FZG test requirements
- Virtually colorless
- Certified NSF and Kosher
