

PRODUCT INFORMATION

Hasco SOL 301A

Product Description

Hasco SOL 301A is a general purpose soluble oil designed for machining and grinding of both ferrous and non-ferrous metals. 301A is perfectly suited for central systems with tramp oil removal systems and filtration.

Advantages & Uses

* 301A is versatile enough to use in operations such as turning, tapping, threading, milling and grinding.

Machining 5-8%
Grinding 4-5%

* 301A mixes easily with both hard and soft water.
* Non-staining to non-ferrous alloys.

Features

* Economical choice for a wide range of applications.
* Polar lubricants increase affinity for surfaces, improving tool life and surface finish.
* High-oil content protects machine equipment against corrosion.

SPECIFICATIONS

Appearance of Concentration	Clear Light Amber
Appearance of Dilution	Milky Solution
pH at 5% Concentration	9.0-9.6
