

PRODUCT INFORMATION

HASCO FM NEXTGEAR OILS

NSF Registered

Product Description

Hasco FM NextGear Lubricants are synthetic products designed to effectively lubricate gear sets and remove heat from loaded and/or high speed systems. Hasco FM NextGear Lubricants are available in ISO grades 68 through 460. Hasco FM NextGear Lubricants can also serve as lubricants for industrial worm gears, rotary steamers and flexible couplings.

Applications

- Straight, bevel, double reduction and worm gear sets.
- Refrigeration conveyor chains
- Airline lubricators
- Reciprocating air compressors

Features

- Versatile product that covers many applications
- Foam inhibited to maximize lubrication
- Meets FZG test requirements
- Virtually colorless
- Certified NSF and Kosher
