

PRODUCT INFORMATION

HASCO FM CRYSTAL GREASES

NSF REGISTERED

Product Description

Hasco FM Crystal Greases are food grade, colorless and greases. They are excellent in multiple applications and are available in NLGI grades 1, 2 and 3. The unique base oil/thickener combination allows for Crystal Greases to have outstanding water-washout properties.

Applications

- Roller and plain bearings found in food processing machinery
- Gear boxes where grease is preferred over oil
- Sealants to prevent contaminants from entering components

Features

- Clear color to reduce food quality issues
- Excellent to -40F
- Provides lubrication at temperatures up to 400F
- Synthetic base stock
- Certified NSF and Kosher
